Enhanced Rewards Program
Natural Gas Home Heating Boilers
Efficiency: AFUE ≥ 90%

March 11, 2013

HIGH EFFICIENCY BOILERS

General Requirements for High Efficiency Home Heating Boiler Rewards:

- Boilers must have an Input Capacity less than 300 MBTUH (Thousand British Thermal Units per hour).
- Boilers must have a modulating burner, and include an outdoor-air reset control (integrated or added to the system).
- Boilers must be a sealed combustion unit.
- Must be customer of participating natural gas utility and use natural gas for home heating. Boilers must be the primary heating source for the home's living space. Only natural gas boilers are eligible.
- Chimney liners must be installed where a high-efficiency gas boiler replaces an atmospherically-drafted boiler and only a water heater remains vented through the chimney. The interior opening left by the removed boiler must be closed with a metal cap and sealed with caulk or mortar.

Natural Gas Home Heating Boiler 90% AFUE - $750 Reward:

- Boiler must have an AFUE of 90% or greater.

The following models have been verified as eligible for this reward by the Focus on Energy Enhanced Rewards Program. Additional requirements apply. Please visit the Residential Rewards page for complete details and to verify eligibility.
